

THANATOS WHITEPAPER
V 1.0

LAST UPDATE AUGUST 2018

"No one wants to die. Even people who want to go to heaven don't want to die to get there. And yet death is the destination we all share. No one has ever escaped it. And that is as it should be, because Death is very likely the single best invention of Life. It is Life's change agent. It clears out the old to make way for the new."

Steve Jobs

1. INTRODUCTION

Few people choose the cause of their death and even less choose what happens after. Most leave this matter to their loved ones that, in their distress, usually relinquish the decision to a funeral service manager. The transition is often a disappointment, without nearly any options beyond “cremate or bury” and “check or card”.

An average funeral with a burial costs approximately \$8,000. In some countries, the enormous cost of organizing an “appropriate” funeral when an unexpected death occurs can lead the families to financial bankruptcy. Nearly everywhere, debts have supported the funerals due to the lack of better options. At long last, technology and competitiveness are beginning to disrupt this conservative industry. The next step: the blockchain.

2. WHAT IS THANATOS

Thanatos is a comprehensive platform built on the blockchain that covers all aspects of a death: inheritances, wakes, burials, cremations, last wills... All this assisted by the Ethereum network and the blockchain technology.

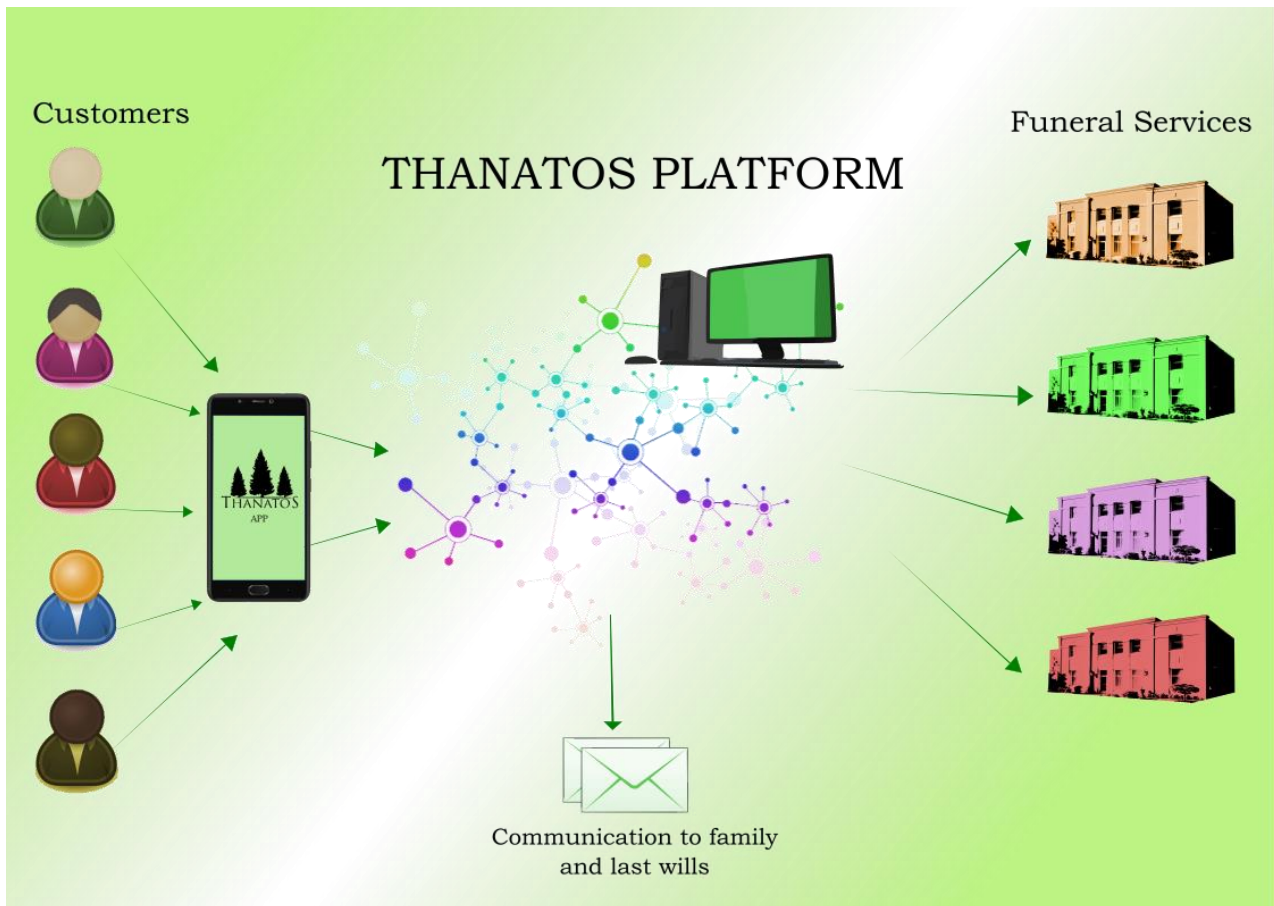

Thanatos allows its users to filter the funeral services that they desire for themselves and for others, regardless of their current situation. This helps prevent unexpected expenses and guarantees a correct transmission of inheritances and wishes. The users can set up through our platform the kind of funeral they want, their last wills, what family members they will notify and a large variety of options that will be available in our app.

After using our services, the family members of the deceased will be able to rate the quality of our services through our app. The funeral parlors with the highest rating of our network will receive a bonus at the end of the year and will become members of our Platinum club.

It doesn't matter what kind of funeral you desire, we support all cultures, faiths and beliefs.

3. THANATOS STRUCTURE

4. TECHNOLOGY

Thanatos will use the blockchain technology on the ERC20 / Ethereum platform to create the Thanatos Token (THAN), this means that the Thanatos Token will be fully integrated with the latest features of the Ethereum blockchain system.

This is a distributed ledger system with automatic calculation, reliable and secure. You can use Thanatos token combined with the Thanatos app as the basis for payment, instead of using the usual cash payment. This will give you better offers and promotions.

More specifically, Thanatos Token is a new electronic type of money used to exchange and pay for our funeral services on the Thanatos platform. Thanatos app Wallet is a secure electronic wallet used to store Thanatos Token that will also allow you to transfer Thanatos Token to exchanges or other wallets as MEW.

5. FEATURES

Once our platform is fully operational, we will be able to offer a wide range of funeral services and personal services which include the following:

- An advanced system of digital inheritances protected by the blockchain technology and the smart contracts. You can bequeath your digital assets to whoever you wish, you will only need to leave your personal information and that of the beneficiary, and our dead man switch system will do the rest. When you stop logging in to the platform for a certain amount of days (that you will have previously determined), the smart contract will execute itself and send your funds, data, messages and everything else that you had previously included to a designated email address.
- A notification system: choose who you want to notify in the case of your death, either by SMS, email, conventional mail or other means of communication. We will inform of your death and of anything that you want.
- A last will system linked to the blockchain: your last words and wishes will be saved in the blockchain for all eternity: unchangeable and released in the case of your death.
- The funeral of your choice: place, music, coffin, decoration... Choose from a wide range of options: from a Scottish funeral to a gothic one, we accept all cultures and religions.

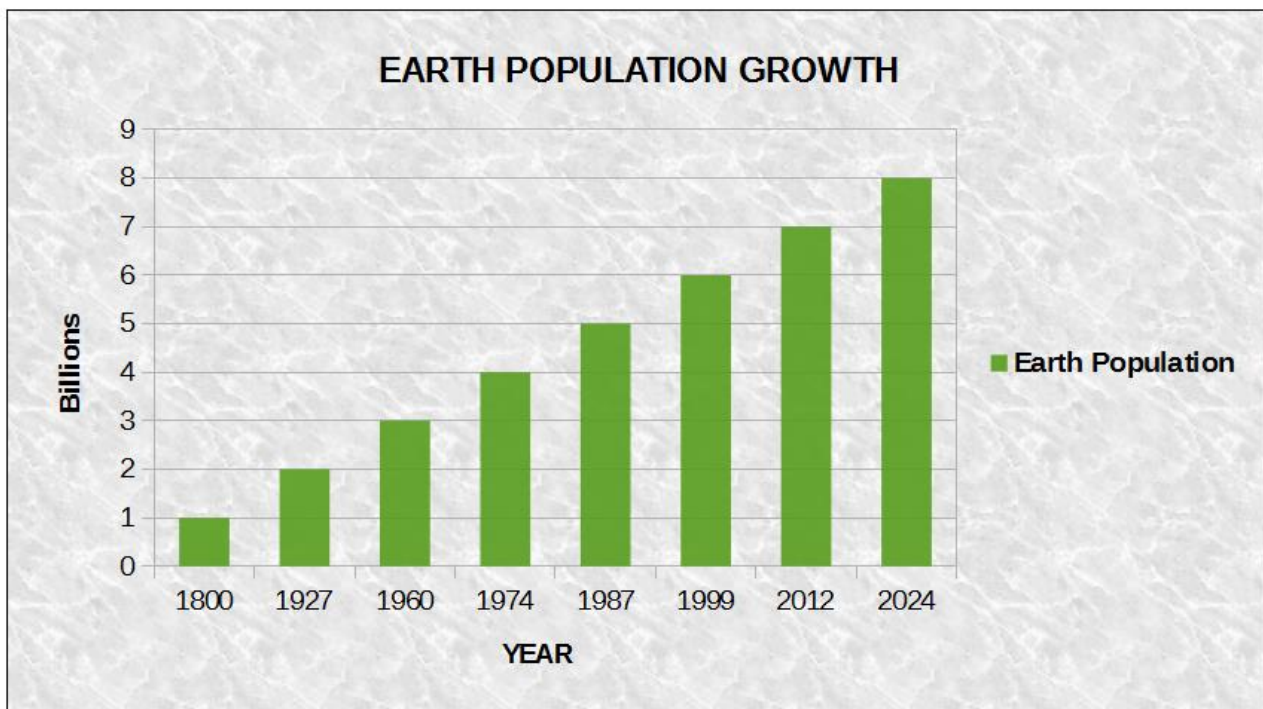

6. MARKET POTENTIAL

The funeral trade has the most basic of business advantages: inexhaustible demand. Every minute more than 100 people die somewhere.

Not everybody pays for a funeral; the lack of funeral services leaves many people without the right of burial and the chance of saying goodbye to their relatives.

The Tibetans still practice sky burial, leaving bodies on mountaintops; the Caviteños in the Philippines bury their dead in hollowed-out tree trunks; the Indians throw their dead to the Ganges River. But in the developed world, dying is big business: it's an industry worth 16 billion dollars in 2017 in America alone.

If we are able to reach and offer our services to even 1% of that demand, that would amount to 160 million dollars every year; it's a huge potential growth for our company.

7. THANATOS TOKEN

Thanatos token is an ERC-20 utility token which will be used under the umbrella of the Thanatos platform, powering the network across all jurisdictions.

All service fees and licensing on the platform will be collected in THAN, meaning any individual or business must hold THAN in order to use a Thanatos account.

In order to create long-term appreciation of the token value, through the utility of the THAN token in the Thanatos Platform, half of the Thanatos received as revenue or platform fees will be burned, until the amount of THAN tokens in circulation reaches the 30% of the total supply, when that amount is reached, the rest will be reintroduced into circulation.

7.1. RELEASE AND DISTRIBUTION OF THE THANATOS TOKEN

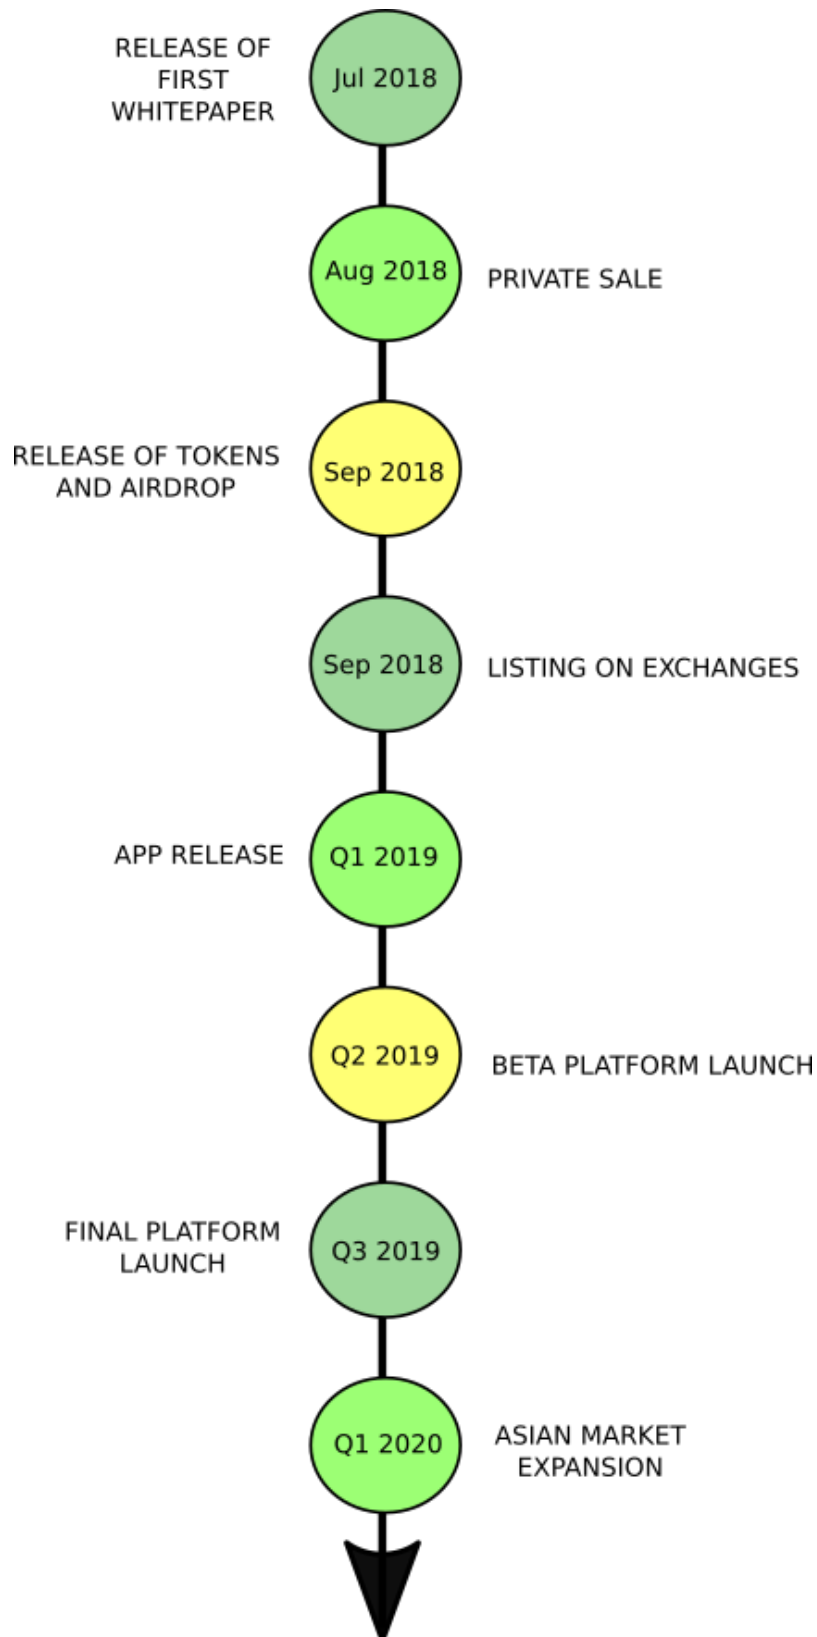

Thanatos token will collect funds through private investors to release and develop the platform and the project.

Thanatos will issue 100 billion tokens, 60 billion of which (60%) will be released as airdrop over two phases: the first with 40% in 2018, the second 20% in 2019 once the platform is live and the token in use. 20 billion (20%) are reserved for the team and other 20 billion (20%) will be sold to private investors to fund the project.

TOKEN DISTRIBUTION

8. ROADMAP

9. PRIVACY

The Thanatos platform is focused overall on protecting your data and your privacy; on the Thanatos platform the account holders have full ownership and control over their own data.

There will be different tiers of data protection, implemented through various means of storage and encryption. These will be optimized to ensure privacy by default and presented in clear and obvious UI.

10. DISCLAIMER

The information set forth in this White Paper may not be exhaustive and does not imply any elements of a contractual relationship. The content might be changed and updated anytime and depends on the development of the project.

This White Paper does not constitute an investment, legal, tax, regulatory, financial, accounting or other advice, and this White Paper is not intended to provide the sole basis for any evaluation of a transaction on acquiring of the Thanatos tokens. Prior to acquiring the Thanatos tokens, a prospective purchaser should consult with his/her own legal, investment, tax, accounting, and other advisors to determine the potential benefits, burdens, and other consequences of such transaction. Nothing in this White Paper shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in any way pertain to an offering or a solicitation of an offer to buy any securities in any jurisdiction. This document is not composed in accordance with, and is not subject to, laws or regulations of any jurisdiction which prohibits or in any manner restricts transactions in respect of, or with use of, digital tokens.

The Thanatos token is not a digital currency, security, commodity, or any other kind of financial instrument and has not been registered under the Securities Act of 1933, the securities laws of any state of the United States of America or the securities laws of any other country, including the securities laws of any jurisdiction in which a potential token holder is a resident. The Thanatos tokens are not being offered or distributed to, as well as can not be resold or otherwise alienated by their holders to, citizens of, natural and legal persons, having their habitual residence, location or their seat of incorporation in the country or territory where transactions with digital tokens are prohibited or in any manner restricted by applicable laws or regulations. If such restricted person purchases the Thanatos tokens, such restricted person has done so on an unlawful, unauthorized and fraudulent basis and in this regard shall bear negative consequences.

Thanatos neither offers or distributes the Thanatos token nor carries on a business (activity) in any regulated activity in People's Republic of China or in other countries and territories where transactions in respect of, or with use of, digital coins and tokens fall under the restrictive regulations or require from Thanatos to be registered or licensed with any applicable governmental authorities.

Each purchaser of the Thanatos token is reminded that this White Paper has been presented to him/her on the basis that he/she is a person into whose attention the document may be lawfully presented in accordance with the laws of the purchaser's jurisdiction. It is the responsibility of each potential purchaser of the Thanatos tokens to determine if the purchaser can legally purchase the tokens in the purchaser's jurisdiction and whether the purchaser can then resell the Thanatos tokens to another purchaser in any given jurisdiction. Certain statements, estimates and financial information contained in this White Paper constitute forward-looking statements or information.

Such forward-looking statements or information involve known and unknown risks and uncertainties which may cause actual events or results to differ materially from the estimates or the results implied or expressed in such forward-looking statements or information.

The English language White Paper is the primary official source of information about the project. The information contained in English language White Paper may from time to time be translated into other languages. In the course of such translation some of the information contained in the English language White Paper may be lost, corrupted or misrepresented. The accuracy of such alternative communications cannot be guaranteed. In the event of any conflicts or inconsistencies between such translations and the official English language White Paper, the provisions of the English language original document shall prevail.
